

PVC Strip Curtains

High-quality strip curtains from one of UK's leading plastics extruders.

Ready to Hang and Easy Maintenance

Copely provides a wide range of PVC strip curtains, available by the strip and ready to hang. Each strip comes with a fitted hanger, making installation quick and simple. Replacing damaged strips is a straightforward process and there is no need to replace the whole curtain.

Why Ready to Hang?

Order by Strip

Ready to hang PVC strips make installation quick and simple. Strips can also be trimmed onsite to the desired length.

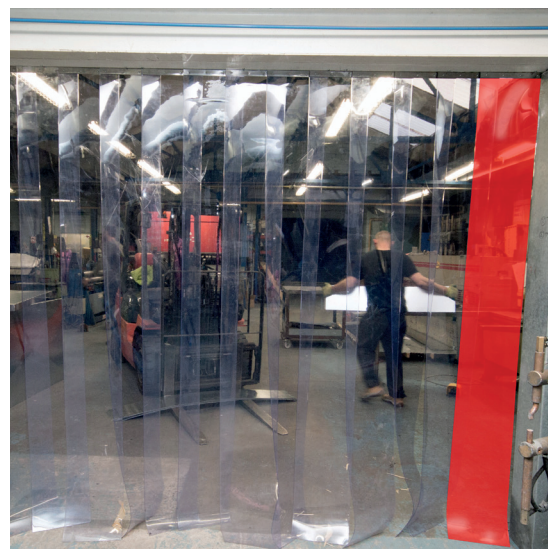

Easy to Maintain

Our PVC strips come with a fitted plate, making replacements and repairs a straightforward and cost-effective process.

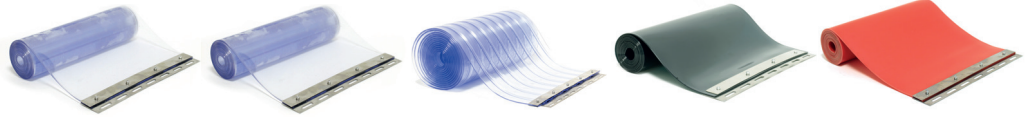

Save Money

Ordering by the strip, means reduced wastage and maintenance costs, along with a reduced risk of damage during fitting.

The Benefits of PVC Curtains

Thermal Insulation

Our PVC strip aid in regulating temperature and increasing overall comfort for employees. Ideal for use in warehouse doorways and loading bays, where the strip curtains help to create a barrier to the outside.

Sound Reduction

Loud working environments can cause exhaustion, distraction, and stress. PVC strips are efficient sound absorbers and noise insulators, ideal for protecting employees from too much noise.

UV Stabilised

A UV stabiliser is added to our curtain strips during manufacturing, protecting the material from ultra-violet light degradation. This property helps to maintain the performance of each curtain strip.
